## How is it going for you?

The project has now passed the half way point and this provides a great opportunity to step back and take stock of the progress and what we need to move forward.

Please scan the QR code on the right or click the link below to answer some short questions on how the project is going so far for you.

We really appreciate your honesty, so if you don't feel engaged tell us why, if a specific piece of training was brilliant share and if you just aren't sure that is ok too.

Please share this with practice teams- ALL ROLES are encouraged to respond.

## Highlight on Patient Resources

As the project has progressed we have been sharing an increasing number of resources to support your care of patients with CKD.

Many of these are linked through the visualisation to make sharing them with your patients as easy as possible.

These include:

- Posters to raise awareness of CKD screening with uACR
- Educational videos about CKD
- Videos and patient information leaflets on specific medicines such as SGLT2i or Finerenone.

See a screenshot of the patient resources available on the project website [LINKED HERE](#).

Questions or Comments & to access training and resources, please get in touch:
