

# Think Kidneys Think Urine Test!

Does your patient have **Chronic Kidney Disease**, or one of the following conditions?\*

**Diabetes Mellitus**

**Hypertension**

**Cardiovascular disease (IHD, CHF, PVD, CVA, TIA)**

If yes, they require annual monitoring of their kidney function.

As in NICE guidelines, please ensure they have an **annual urine test for albumin-creatinine ratio (uACR)** alongside the **annual blood tests for eGFR**.

*\*Not an exhaustive list see NICE guidelines for full list*

# Think Kidneys Think Urine Test!

Do you have any of the following conditions?

**Chronic Kidney Disease (CKD)**

**Diabetes Mellitus**

**Hypertension**

**Cardiovascular disease**

*(this includes history of heart problems and strokes, if you are unsure please ask)*

If yes, you should be having an annual check of your kidney health.

Speak to the practice about having an **annual urine test** alongside your **annual blood tests**.
